Re: United States Patent No. 6940016
Issued: Sep. 06, 2005
Inventor(s): Roger Cornett; Douglas Rohrer
For: Electrical Rough-In Box for Low Voltage Transformer

Dear Sir:

In proofreading the above-referenced United States Patent against the patent application text, it was noted that the following error requires correction:

Column 1, line 39, insert --electric-- in between "local codes";

At the present time, this error does not warrant a certificate of correction under 35 USC 254 and this letter is being forwarded in lieu thereof. Since this error is due to an Office mistake, no fee is due pursuant to 37 CFR 1.322. We would, therefore, appreciate and ask that the instant letter be placed in the file wrapper for the above-referenced United States Patent so as to become a permanent paper in the records.

Respectfully submitted,
MIDDLETON REUTLINGER

John F. Salazar, Esq.
Reg. No. 39,353
